EXPERIENCE

Tuesday Labs

June 2025 – Present | New York, NY

Founding Robotics ML Engineer

- **First full-time hire** at Tuesday Labs, building a **delightful home-tidying robot**.
- Built the **deep reinforcement-learning stack** from the ground up on **IsaacSim / Newton** (sim2sim in **MuJoCo**); led a **software team of four** through **five prototype iterations** and **delivered** a video ready robot built upon a stable hardware platform in 6 months in time for the company launch.
- **Pivoted** comms infrastructure from **ROS2** to **pure DDS**, eliminating ROS2's intractable latency for **sim2real** transfer.
- Produced **novel locomotion gaits** and character body language, shaped with **ex-Pixar animators**.
- **Spearheaded** automated, repeatable hardware-validation tests, cutting design validation from **weeks to one day**.
- Built a modular, extensible **behaviour orchestration stack**, enabling **reliable and smooth model switching**.

Arena AI

Feb 2023 – May 2025 | New York, NY

Machine Learning Scientist (Deep Learning)

- **Led** the development of for our AI hardware engineer (think JARVIS for Tony Stark).
- **End-to-end owner and creator** of a transformer-based multi-modal representation learning pipeline that gave a **33% improvement** over the best OpenAI GPT model at the time on the entity-resolution task.
- Founding member, One-Brain team, a transformer-based foundation model for optimal sequential decision-making.
- Part of a six-member team directly responsible for **successfully signing a Fortune 50 company**.

National Robotics Engineering Center, CMU-RI

October 2020 – Feb 2023 | Pittsburgh, PA

Graduate Research Assistant (Robotics)

- **Solely responsible** for decentralized adversarial multi-agent active search in natural environments with unreliable communications and noisy observation spaces on UGV and UAV hardware.
- Proposed *Generalized Uncertainty-aware Thompson Sampling* (GUTS) algorithm. **Outstanding Paper Award at ICRA 2023**.
- Proposed *Stealthy Terrain-Aware Reconnaissance* (STAR) algorithm. **Paper accepted at CoRL 2023**.
- Both algorithms **beat state-of-the-art** methods on recovery rate of targets in rigorous simulation experiments and field tests in large natural environments up to 4 km².

ComplyAdvantage

July 2019 – November 2020 | London, UK

Machine Learning Engineer (NLU)

- Part of a six-member team that **delivered** an end-to-end product overhaul using state-of-the-art transformer-based LLMs for adverse media classification. Clinched the company's first **seven-figure deal**.
- Spearheaded the effort to **debias** model performance with respect to **gender, race, ethnicity** and **nationality**.
- Expanded the product to a **multilingual** setting to perform with comparable accuracy in **six other languages**.

Sears Holdings India

August 2017 – April 2019 | Pune, India

Data Scientist (Deep Learning)

- **Led a project** to predict life events of shoppers from transaction history using CNNs. **Best Oral Presentation at ICBDT 2018**.
- **Led a team of three** to design an intention-recognition algorithm to supplement the workflow of user support agents. **Star Performer Award**.

EDUCATION

Carnegie Mellon University — Master of Science in Robotics, '22

Thesis: See but Don't Be Seen: Towards Stealthy Active Search in Heterogeneous Multi-Robot Systems

Indian Institute of Tech. Kharagpur — Bachelor of Technology, '17

Major: Mechanical Engineering · **Minor:** Computer Science

SELECTED PUBLICATIONS

Conference Proceedings

- **Decentralized Uncertainty-Aware Active Search with a Team of Aerial Robots.** W. Tabib, ..., N. A. Bakshi, T. Gupta, ..., J. Schneider. *19th International Symposium on Experimental Robotics (ISER)*, 2025.
- **GUTS: Generalized Uncertainty-Aware Thompson Sampling for Multi-Agent Active Search.** N. A. Bakshi, T. Gupta, R. Ghods, J. G. Schneider. *IEEE International Conference on Robotics and Automation (ICRA)*, 2023. **Out-standing Paper Award.**
- **Stealthy Terrain-Aware Multi-Agent Active Search.** N. A. Bakshi, J. Schneider. *7th Conference on Robot Learning (CoRL)*, 2023.
- **Citation Sentence Reuse Behavior of Scientists: A Case Study on Massive Bibliographic Text Dataset of Computer Science.** M. Singh, A. Niranjana, D. Gupta, N. A. Bakshi, A. Mukherjee, P. Goyal. *ACM/IEEE Joint Conference on Digital Libraries (JCDL)*, 2017.
- **Indirect model reference adaptive control of quadrotor UAVs using neural networks.** N. A. Bakshi, R. Ramachandran. *10th International Conference on Intelligent Systems and Control (ISCO)*, 2016.

Book Chapters

- **Model Reference Adaptive Control of Quadrotor UAVs: A Neural Network Perspective.** N. A. Bakshi. *In Adaptive Robust Control Systems (Ch. 8)*, IntechOpen, 2018.

Journal Articles

- **Predicting Pregnant Shoppers Based On Purchase History Using Deep Convolutional Neural Networks.** N. A. Bakshi, P. R. Kolan, B. Behera, N. Kaushik, A. M. Ismail. *Journal of Advances in Information Technology*, Vol. 9(4), pp. 110–116, 2018. **Best Oral Presentation, ICBDT 2018.**

Theses

- **See but Don't Be Seen: Towards Stealthy Active Search in Heterogeneous Multi-Robot Systems.** N. A. Bakshi. *M.S. Thesis, Carnegie Mellon University (CMU-RI-TR-22-69)*, 2022.
- **Cross-Lingual Transfer of Semantic Information Using FrameNet.** N. A. Bakshi. *B.Tech Thesis, Indian Institute of Technology Kharagpur*, 2017.

AWARDS

- | | |
|---|---------------------------------------|
| ★ Outstanding Paper at ICRA '23 | ★ Best Presentation at ICBDT '18 |
| ★ Full-ride for Master's at CMU '20-'22 | ★ Winner of Sears India Hackathon '18 |
| ★ Star Performer Award, Sears, '18 | ★ INSPIRE Scholarship '13-'14 |
